PROFESSIONAL SUMMARY

Hi, my name is Lutho Jama, an aspiring Front-End Developer working with HTML, CSS, Tailwind CSS, JavaScript, React, TypeScript, and more.

My goal over the next year is to become a Full-Stack Software Developer, and I'm actively taking steps towards that goal.

Why front-end?

Front-end development has always been a passion of mine. Like a painter or sculptor, there's something fulfilling about creating something from scratch and bringing an idea to life. I've always yearned for that kind of fulfillment, and tech answered that call.

WORK EXPERIENCE

Bartender | *Mojo Market (Sea-Point - Western-Cape)*

May 2023 – Current

- [Hospitality — As a bartender I took and prepared customer orders efficiently, ensuring excellent customer satisfaction while managing time and working under pressure in a fast-paced environment.]
- [Impact — Working long hours and being constantly on call taught me how to manage my time, adapt quickly, and perform under pressure. These are skills closely related to development, where developers often work in fast-paced environments, solve problems, and meet important deadlines.]
- [Teamwork — Working closely with other bartenders teaches me the importance of clear communication, teamwork, and supporting those around me to achieve a common goal. I figure these skills are just as important in tech, where developers collaborate, share ideas, and work together to build great products.]

EDUCATION

Software Development Programme | *CodeSpace Academy*

2025 – 2026

Intensive full-stack bootcamp covering HTML/CSS, JavaScript, React, Git, and capstone projects.

Higher Certificate in mobile application and web-development | *Rosebank College*

2022 – 2023

Built the foundation that sparked my passion for Front-End Development. I gained hands-on experience building websites using HTML, CSS, and JavaScript, as well as developing web applications using Kotlin.

Matric | *Mountainview High School*

2019

KEY PROJECTS

E-commerce store (COZYWEAR) — [HTML, CSS, JavaScript] | Live: <https://e-commerce-store-pro.netlify.app> · Code: [luthojama1/E-Commerce-Store-Project](#)

[I built an e-commerce store called CozyWear, where users can browse and select clothing items, add them to their cart, and manage their selections using add and remove functionality with real-time price updates.]

[Key features include:

- Browse and view clothing items
- Add items to the shopping cart

- Remove items from the cart
- Increase or decrease item quantities
- Real-time cart price updates
- Dynamic shopping cart functionality]

Kanban Task Manager — [HTML, CSS, JavaScript] | Live: <https://kanban-task-manager-1.netlify.app> · Code: [luthojama1/Kanban-Task-Manager](#)

[I built a Kanban Task Manager that allows users to create, organize, and track tasks by moving them through different stages such as To Do, Doing, and Done.]

[Key Features Include:

- Create and manage tasks
- Organize tasks into different columns or stages
- Move tasks between stages (e.g. To Do, Doing, Done)
- Add and edit task details
- Track task progress
- Delete completed or unwanted tasks
- Simple and intuitive task management interface]

Podcast App — [React] | Live: <https://react-podcast-app.netlify.app> · Code: [luthojama1/React-Podcast-App](#)

[I built a podcast app that integrates with an API to allow users to browse, discover, and listen to a variety of podcasts through a simple and user-friendly interface.

[Key Features Include:

- API integration for podcast data
- Browse and discover a variety of podcasts
- Search for podcasts
- Listen to podcast episodes
- View podcast and episode details
- Add podcast to favourites
- Simple and user-friendly interface]

TECHNICAL SKILLS

Languages: [JavaScript (ES6+), TypeScript, React, HTML5, CSS3]

Frameworks & Libraries: [React, Tailwind CSS]

Tools & Platforms: [Git/GitHub, Netlify]

Practices: [REST API Design, Code Review]

CERTIFICATIONS

- Higher Certificate in Mobile Application and Web Development
- Software Development
